FULL STACK DEVELOPER

PROFILE

Full-stack developer focused on building fast, accessible, and maintainable digital products. Experienced across modern frontend interfaces, server-side APIs, databases, and business websites, with an emphasis on clear communication and thoughtful product decisions.

CORE SKILLS

Frontend	Backend	Delivery
React, Next.js, JavaScript, TypeScript, Tailwind CSS	Node.js, Express.js, REST APIs, MongoDB	Responsive UI, accessibility, performance, Git, deployment

SELECTED PROJECTS

CommerceFlow Platform

MERN stack commerce experience with product discovery, secure checkout, and an administration workflow.

Nexora SaaS

Conversion-focused Next.js product site with reusable components, responsive layouts, and performance-minded implementation.

Haven Real Estate

Business-focused property website with structured listings, intuitive discovery, and clear lead-generation paths.

CAPABILITIES

- Full-stack web application development from interface to database.
- Responsive frontend implementation with accessible interaction patterns.
- Custom WordPress websites for service-based and property businesses.
- Performance improvements, bug fixing, feature development, and maintainable refactoring.

WORKING STYLE

Clean architecture - Reusable code and maintainable systems designed to grow.

Reliable delivery - Clear milestones, transparent progress, and consistent execution.

Product thinking - Technical decisions connected to real user and business goals.

Quality focus - Responsive experiences with careful attention to performance and detail.

References and detailed project case studies are available on request.
