

HAROON BUTT

Software Engineer | MERN Stack

+92 3096011345 • haroon116butt@gmail.com • linkedin.com/in/haroonbutt786 • Lahore

Summary

Full Stack Developer with 1.5+ years of experience building and deploying production-grade MERN applications, adept in MERN Stack, JWT authentication, and payment integration. Noteworthy for delivering end-to-end projects spanning marketplaces, e-commerce, and admin analytics tools, and for resolving production-level deployment and integration issues that cut failed requests by an estimated 25%.

Skills

React Js · Next Js · Wordpress · Redux · Node.js · Express.js · MongoDB · Mongoose · JWT Authentication · Stripe API · REST API Design · Tailwind CSS · Next.js · Git/GitHub · Vercel · Render

Experience

IIFA TECH

MERN Stack Developer

Lahore, Pakistan

04/2026-Present

- Build and maintain dynamic React.js applications using hooks and component-based architecture, improving component reusability **~30%**
- Develop and consume RESTful API endpoints with Node.js/Express.js, supporting core product features end to end.
- Implement JWT-based authentication and role-based access control, and optimize MongoDB/Mongoose schemas and queries, **cutting** average query response time **25%**
- Integrate third-party APIs and collaborate in agile sprints with code reviews, contributing to consistently on-time production deployments.

TECHI TRIBE

Front End Developer

Lahore, Pakistan

02/2025 - 02/2026

- Delivered multiple full-stack MERN applications with JWT authentication and Stripe payment integration across client projects.
- Built responsive UIs with modern CSS and component libraries, improving cross-browser compatibility and **shrinking** UI-related bug reports **20%**
- Deployed applications on Vercel and Render, helping maintain strong uptime across staging and production environments.

Education

University of Gujrat

Bachelor's in Computer Science

Gujrat, Pakistan

08/2020 - 10/2024

Key Projects

AutoVibe — Car Buying & Selling Marketplace

auto-vibe-smoky.vercel.app

- Engineered a full-stack MERN vehicle-listing marketplace supporting 500+ listings, with a JWT-protected RESTful API and role-based access control across buyer, seller, and admin roles.
- Built a real-time Admin Dashboard for analytics, user management, and package monitoring, cutting manual reporting effort by an estimated 40%.

- Deployed frontend on Vercel and backend on Render with secure environment configuration and CORS handling, reducing deployment-related errors by approximately 25%.

E-Commerce Full Stack MERN App

Stack: React.js, Vite, Node.js, Express.js, MongoDB, JWT, Stripe, Vercel, Render

- Built an end-to-end e-commerce platform covering product listings, cart, order tracking, processing test transactions with a 100% payment success rate.
- Diagnosed and resolved production-level bugs, improving API reliability and cutting failed requests by 25%.
- Implemented JWT authentication with secure cookie handling, protecting 15+ API routes across frontend and backend.

Interests

Web Development & New Tech

Following new frontend and backend frameworks and experimenting with them in side projects

Teaching & Mentoring

Teaching core CS and programming concepts to students, drawing on prior classroom experience as a CS instructor

Photography

Capturing everyday scenes and landscapes, especially during day trips around Punjab.

Certifications

Frontend Development (React & Redux) — IBM Coursera

Node.js REST API with Express & MongoDB — Coursera

Google Analytics Certification — Google Skillshop
